PRODUCT MANAGER -- GENERIC LOGISTICS CO (2 years)

Worked on freight forwarding software, coordinated with ops teams on customs documentation and carrier exception handling. Shipped several dashboard features used by the ops team daily. Reviewed quarterly metrics with the operations lead and adjusted priorities based on findings. Partnered with engineering to scope a documentation-review tool that reduced manual rework during peak shipping season, and ran weekly syncs with the customs brokerage partner team.

SKILLS

Product management, stakeholder communication, data analysis, cross-functional coordination, roadmap planning, user research synthesis, agile ceremonies, KPI tracking, documentation review

, vendor management, prioritization frameworks, qualitative and quantitative research methods.

EDUCATION

Bachelor's degree in a technical field, graduated with coursework in operations management and business analytics, completed relevant coursework in supply chain fundamentals as well. Participated in a semester-long capstone project analyzing warehouse throughput bottlenecks.

ADDITIONAL

Fluent in two languages. Comfortable working across distributed, asynchronous teams spanning multiple time zones, with a track record of clear written communication in cross-team settings.

Revision marker: journey-fixture-v2.
